3. Graph the line $y = 2x - 3$

4. Explain in one sentence why a negative times a negative is positive.

Algebra 1 - Quiz 3

Name: Tomas Okafor Date: 11/7

Period: _____

1. Solve for x: $3x + 7 = 22$

2. Simplify: $(2x + 4) - (x - 1)$

3. Graph the line $y = 2x - 3$

4. Explain in one sentence why a negative times a negative is positive.

Algebra 1 - Quiz 3

Priya Raman

Date: 11/7

Period:

1. Solve for x: $3x + 7 = 22$

2. Simplify: $(2x + 4) - (x - 1)$

3. Graph the line $y = 2x - 3$

4. Explain in one sentence why a negative times a negative is positive.

Algebra 1 - Quiz 3

Name: Marcus Delgado Date: 11/7

Period: _____

1. Solve for x: $3x + 7 = 22$

2. Simplify: $(2x + 4) - (x - 1)$

3. Graph the line $y = 2x - 3$

4. Explain in one sentence why a negative times a negative is positive.

Algebra 1 - Quiz 3

Name: Dana Kowalski Date: 11/7

Period: _____

1. Solve for x: $3x + 7 = 22$

2. Simplify: $(2x + 4) - (x - 1)$

3. Graph the line $y = 2x - 3$

4. Explain in one sentence why a negative times a negative is positive.
